

Combined Intake, Release & Save Rates

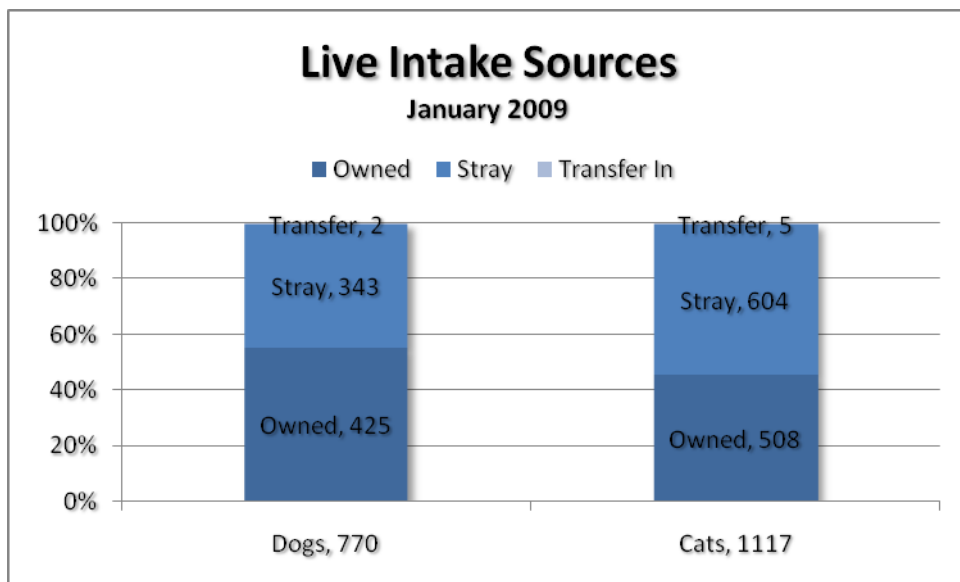

Canine Intake, Release & Save Rates

Live Release Rate is calculated by dividing total live outcomes (adoptions, outgoing transfers, and return to owner/guardian) by Adjusted Live Intake.

Save Rate is calculated by dividing Adjusted Euthanasia by Adjusted Total Intake including animals in shelter on 1/1/09 and subtracting the result from 1.

Live Release Destinations

January 2009

■ Returned to Owner ■ Sent to PSPCA for adoption ■ Sent to Rescue Partners
